

data guardian

Safeguard your business data with secure online backups

DataGuardian™ from Technology Management lets you backup and retrieve all your important files, databases and emails safely, without the need to rely on backup tapes for your server or external hard drives for your PC.

DataGuardian is a secure, fast and automated system that guarantees you 24/7 access to information vital for your business.

- ✓ Encrypt and back up all your files, emails and databases to our secure off-site servers
- ✓ Automatically back up your data over the internet throughout the day and night
- ✓ Restore your data saved in the past
- ✓ Carry on working on your documents over the internet, even if your server is down

Why the Need for DataGuardian?

The problems with tape backup are well known; tape hardware and backup software are expensive, as is the time required to set up and maintain them. Tape cartridges are a continuing cost and completing daily tape backups requires time and inconvenience. Tape backups can involve system downtime, since the system being backed up cannot be used during the process.

Given the increasing need for round-the-clock data access, it's getting harder for companies to complete nightly backups within the time window provided. Sometimes daily backups slip to every other night, exposing businesses to a greater risk of lost data.

Similar problems exist for individual users who simply want to backup data on their desktop PC or notebook, with backups to external hard drives only happening every few days or weeks.

Given the increasing volumes of data businesses rely on to operate and compete, DataGuardian is a convenient, safe and affordable solution to safeguarding your data.

How it Works

DataGuardian is software that's easy to install on your server, notebook or desktop PC. Once set up, DataGuardian runs in the background, automatically backing up your data to Technology Management's data centre

Immediate access to your files and other data is available securely on our servers at a moment's notice - all you need is an internet connection and Microsoft Windows server or client software to access and synchronise your data.

Flexible Pricing

DataGuardian is a flexible solution that can be tailored to suit your business needs. Overleaf are example solutions and guide prices.

How to Order

For a demonstration and to discuss your data backup strategy, contact Technology Management on **01902 578300** or visit **www.tecman.co.uk**
