technology management

Technology Management

Hosted Applications Disaster Recovery

In partnership with a Midlands-based professional global hosting centre, Technology Management offers a purpose built data centre dedicated to provide fast and secure business hosting services.

The centre encompasses a full feature Network Operation Centre with continual 24/7 monitored network, this coupled with a Cisco powered, fast, diverse network we achieve maximum operating efficiency for your hosting requirements.

High level security features of the hosting facility include steel reinforced walls, ceiling and floors. 24 hour monitored CCTV, and a sophisticated alarm system.*

The centre features include a large uninterruptable power supply (UPS) and an auto start generator to ensure power supply to your servers is always available, together with an environmentally controlled data centre to ensure the best conditions are maintained for your servers.

*For obvious reasons we do not publish or discuss all of the security measures.

Power

· 300KVA Auto Start Generator
· 300KVA UPS
· 5 Days Fuel on site with 24/7 fuel supply agreement
· Regular testing procedure
· Brown Out Detection (Voltage drop across phases).

Environmental

· Reserve capacity air conditioning
· Humidity monitoring
· Air flow planned and managed.

Network

· BT Fibre
· NTL:Telewest Fibre
· Multiple Carriers for Internet Transit
· Physically diverse fibre entry points to building
· High speed microwave network backup to another network node
· Co-Location space available on our private radio communications mast.

Infrastructure

· High availability firewalls
· Clustered server environment and storage including virtualisation technology
· Diverse backups.

Technical Support

· 24/7 network monitoring and alert system
· Just like traditional 'on-premise' software, hosted business.
